

## EXCLUSIVE: Foxconn Groundbreaking Date Set For June 28

I have learned that the public groundbreaking ceremony for the enormous Foxconn facility in southern Racine County has been set for Thursday June 28. It is possible that President Trump will be in attendance but that will obviously be contingent on anything else happening in the world around that time. Foxconn officials have begun telling local VIPs to set the June 28 date aside. Foxconn is just beginning to issue contracts and subcontracts for the site preparation work at the massive site just north of the Racine-Kenosha county line. The groundbreaking has obvious political ramifications given Governor Walker's ongoing reelection campaign. It is also the symbolic launching of the largest commercial development in Wisconsin history and one of the largest single private economic development projects in American history.
