

EXCLUSIVE: State School Boards Convention Pushes Pro-Democrat, Liberal Agenda
By Mark Belling, WISN-AM

Last week's convention of the Wisconsin Association of School Boards and State Association of School Administrators, whose attendees included board members and superintendents from school districts in conservative areas, featured an extreme left wing agenda and a presentation by the head of the state association of school administrators who used his talk to trash Republicans and push a Democrat agenda.

The director, John Forester, who runs the State Association of School Administrator's Madison staff, handed out an outline of his presentation which included numerous leftist talking points including "Senate GOP Caucus Politics Poisonous." One local school board member who attended the session called the level of bias "disgusting." The association is supported by dues that come from school budgets of districts across the state, many of which are in conservative areas. Here is a link to Forrester's leftist presentation:
