Subject: Open Records Request

Mr. Belling: I am following up on your public records request to Dr. Kelly Thompson, requesting: "Copy of any record, including email, in which you speak favorably about the school referendum proposal on the April ballot from January 1 of this year to the present. This request is limited to any communication generated by you using school district resources. This request, by its nature, includes any document or record generated while on school property or using school district equipment."

We have searched for records responsive to your request, including the review of electronic records using school district resources. We have found no records in which Dr. Thompson speaks, as you characterize it, "favorably about the school referendum proposal on the April ballot."

There are numerous emails either sent by or to Dr. Thompson which generally refer to or contain references to the April referendum. If you would like to see any of those emails, please let me know.

Sincerely,

Jeff Petersen
