Subject: Your Outrageous Behavior

Rep. Sanfelippo:

This email will memorialize that you approached me in the public hallway yesterday afternoon immediately following the 2019 Assembly Committee on Judiciary hearing on AB322 and called me, to my face and loud enough for several others to hear, "a LIAR and a PIECE OF SHIT" in response to my testimony at said hearing. I am quoting your words verbatim. You repeated these words, among other personal insults, loudly, several times and in the presence of several witnesses.

I responded that my testimony was 100% truthful and that I would be happy to review my testimony on Wisconsin Eye with you and issue a corrective statement if anything that I said was incorrect. This offer still stands, although, to be clear, I continue to stand by my testimony.

I hereby request that you promptly correct the record in writing if you claim to have said or heard something different from what is herein described. I am always willing to meet, talk things through, and attempt to reach resolution.

I find your language and behavior to be offensive, outrageous and unbecoming of a State Representative. I believe that, at a minimum, you owe me an apology.

Judge Randy R. Koschnick
Director of State Courts

Subject: FW: Your Outrageous Behavior

Dear Judge,

I am sorry that you are so easily offended. Often times, it is the truth that hurts the most.

I am open to considering that the word "liar" was misused in this case as it infers that a person knowingly makes a false statement. It could very well be that you are just incompetent and do not know what you are talking about.

In either event, the real offensive and outrageous action here is your objection to providing the maximum amount of transparency in our criminal justice system. Why don't you visit the mother of the 3 year-old girl that was murdered in Milwaukee recently, look her in the eye and tell her why Judges, District Attorneys and everyone else who swears an oath or takes a job that involves protecting the public should not have the light of transparency shown upon their work.

Yours Truly,
Joe

P.S. In the future you may want to avoid having people from your office lie directly to legislators. We are all grownups over here and can handle the truth.
