Governor Tony Evers [@GovEvers](#)

We have three branches of government to ensure a system of checks and balances, and questions about our elections typically rely on all three playing a role. If I could have changed the election on my own I would have but I can't without violating state law.

I've asked the legislature to do its part to ensure a fair, safe election and I hope we can get some clarity as soon as possible. The bottom line is that we have to keep folks safe and we have to make sure everyone who wants to vote has the opportunity to make their voice heard.

As of tonight 1/3 of the registered voters in my small town have absentee ballots. I am down 5 poll workers. My task this evening is to build a plexiglass barrier for our remaining team of poll workers. Thank you Gov Evers for your leadership and support.
